Open Invitation & Continuing Challenge

From Your PAL@OurPal.com

Even at the risk of sounding like an everyday garden variety crackpot, I think the prevailing paradigm of science & reality is no longer defensible.

To provide a forum for discussing this challenge we conduct several meetings every year.

You can win Cool \$1000/-

for each disagreement successfully countered. Information about the meeting is attached and is also available at

www.OurPal.com

This is an **open invitation** and **continuing challenge** to all. **You are especially invited** and would be most welcome but you can send a representative or if that is not convenient, I will be willing to come to your place at your convenience. Your assistance in communicating this challenge to more appropriately qualified will be most appreciated.
